

## FT Docs

### FirstTensor Neural Cluster

Inspired by Bittensor network, the Neural Cluster contains a collection of 2795 FT Neurons. Each of them has the ability to bring different benefits to its holder within the FirstTensor ecosystem.

By owning one FT Neuron, the owner gets free access to the apps built by FirstTensor and also have a boost to generate Bitneuron (\$NEURON) tokens on a daily basis.

### What are FT Neurons?

In the beginning of our journey, FT Neurons was our unique approach to funding and maintaining the FirstTensor validator, as we were returning the full tax back to our FT Neuron holders.

Now we are charging ZERO fees (0%) for all delegators, and distribute a part of the value we are building to our community through Bitneuron tokens.

The early adopters of FT Neurons received multiple airdrops with Bitneuron tokens.

FirstTensor will use a part of the income generated by the tools to buy and burn \$NEURON. In this way the Validator will distribute a part of the value to its community.

FirstTensor Delegator Benefits	FT Neuron Holders Benefits
Max APR for TAO	Boost your \$NEURON token generation
\$NEURON token generation	Free Access to FirstTensor Apps
	Validator API Access

## FirstTensor Apps

[FirstStudio.ai](#) - The first AI studio built on top of the Bittensor network aiming to onboard 10 million users. Text-to-image / audio / video.

[FirstAds.ai](#) - The first app built on top of the BitAds (Subnet 16) infrastructure, where you can create your own advertising campaign at a fraction of the cost, and start promoting your products or services with an army of influencers.

[BittensorMining.com](#) - The place to go when you want to learn how to mine TAO on different subnetworks within the Bittensor ecosystem.

## Bitneuron (\$NEURON) Tokenomics

Contract: 0x5CAF357d6fd0638710ab31fBFFF6E790BE768c39

Total Supply: 100 billion (inspired by the estimated maximum number of neurons in the human brain).

- 10% listing liquidity
- 10% allocated for rewards to FirstStudio.AI platform users, based on their activity and contributions to the ecosystem
- 12% designated for staking rewards
- 20% allocated to FirstTensor delegators
- 48% distributed to FT Neuron holders

## How it will work?

FirstTensor Validator will launch its API, called BrainTensor. Through this, developers will be able to access the Bittensor network intelligence and build their tools.

Developers interested in this option will need to integrate Bitneuron into their projects. To qualify, they must submit their product concept, detailing how it will enhance the utility of the Bitneuron token. If the community votes in favor of the project, it will be granted complimentary API access.

In this model, FirstTensor will allocate 70% of the profits derived from selling BrainTensor API access to buy and burn Bitneuron Tokens.

## Token Utility

Bitneuron token will empower the entire economy of multiple products developed via BrainTensor API and incentivize users to embrace and contribute to the FirstTensor ecosystem's expansion.

All the tools built through BrainTensor (FirstTensor API) will have a deflationary impact on Bitneuron tokens supply and will increase the token's utility.
